

## Accessing Internet from your Home Network on Chromebook

In order for students to use their home Internet on the Chromebook, they will need to follow an authentication process for each network. It is possible that they may have to repeat this process if the authentication is lost. Please follow the directions below:

- a. Login to your Chromebook
- b. Attempt to access a website other than Google (cnn.com/espn.com)
- c. You will be asked to enter a username & password:  
Username: [websense@students.durantisd.org](mailto:websense@students.durantisd.org)  
Password: websense
- d. Now you should have the same filtered access to the Internet off campus as you have on campus.
